

Brand Name: EROXIB-TH4

Composition: Etoricoxib & Thiocolchicoside tablets

Dosage Form: Tablets

Category: Muscle Relaxant & Anti-inflammatory Combination

Packaging Type: ALU-ALU

Packaging: 10 x 10 tablets

Brief Product Introduction:

EROXIB-TH4, manufactured by **AstraEureka Pharmaceutical**, is a scientifically balanced formulation combining **Thiocolchicoside 4 mg** and **Etoricoxib 60 mg**, specifically designed for effective relief from musculoskeletal pain and inflammation. As a trusted **manufacturer of this dual-action composition**, AstraEureka ensures high-quality production standards and therapeutic efficacy. Thiocolchicoside acts as a centrally acting muscle relaxant, while Etoricoxib, a selective COX-2 inhibitor, delivers powerful anti-inflammatory and analgesic effects. EROXIB-TH4 is indicated in conditions such as acute low back pain, cervical spondylosis, osteoarthritis, and muscular spasms associated with trauma or inflammation. This combination improves mobility, reduces muscle stiffness, and enhances functional recovery. The film-coated tablet ensures better patient compliance and gastric tolerability. Ideal for short-term symptomatic relief, EROXIB-TH4 is a valuable option in pain management protocols involving both inflammation and muscle spasm.

Composition:

Each film-coated tablet contains:

Thiocolchicoside IP.....4 mg
Etoricoxib IP.....60 mg
Excipients.....q.s.

Key Ingredients:

- Thiocolchicoside 4 mg
- Etoricoxib 60 mg

Key Benefits:

1. Dual-action relief: muscle relaxation and inflammation control
2. Rapid reduction in muscle spasms and pain
3. Improves joint mobility and muscular function
4. Selective COX-2 inhibition minimizes GI side effects
5. Convenient once-daily dosing

Indications:

1. Acute low back pain
2. Cervical and lumbar spondylosis
3. Muscle spasms and contractures
4. Post-traumatic muscular pain
5. Osteoarthritis with muscle stiffness
6. Painful musculoskeletal conditions with inflammation

Directions for Use:

1. Take one tablet once daily after meals
2. Swallow whole with water
3. Do not chew or crush
4. Follow the physician's prescribed schedule

Dosage and Administration:

1. **Adults:** One tablet daily or as directed by the physician
2. **Duration:** Short-term use only (5–7 days recommended)
3. **Pediatric Use:** Not recommended unless prescribed
4. Avoid exceeding recommended dose

Safety Information:

1. Use under medical supervision only
2. Avoid alcohol and other CNS depressants
3. Monitor liver and renal functions in long-term use
4. Not recommended during pregnancy or lactation

Mechanism of Action:

Thiocolchicoside is a muscle relaxant that acts on the central nervous system by binding to GABA-A and glycine receptors, reducing muscle hyperactivity without sedation.

Etoricoxib selectively inhibits the COX-2 enzyme involved in prostaglandin synthesis, thereby decreasing pain and inflammation while sparing gastric mucosa from COX-1 inhibition. Together, they offer synergistic control of pain and spasms.

Contraindications:

1. Hypersensitivity to Etoricoxib, Thiocolchicoside, or NSAIDs
2. Active peptic ulcer or GI bleeding
3. Severe hepatic or renal impairment

4. History of cardiovascular disease
5. Pregnancy and breastfeeding

Side Effects:

1. Nausea, abdominal discomfort
2. Drowsiness or dizziness
3. Diarrhea or flatulence
4. Rare: Liver enzyme elevation, allergic reaction

Important Notice:

- Not for long-term use
- Avoid operating heavy machinery after taking
- Inform your doctor about any other ongoing medications
- Discontinue immediately if any signs of allergy appear

Storage Condition:

1. Store below 25°C in a dry place
2. Protect from light and moisture
3. Keep out of reach of children

Packing Information:

- Each strip contains 10 film-coated tablets
- Packed in ALU-ALU Pack
- Box contains 10 strips (10 x 10 = 100 tablets)
